

PetSoft™

Designed for **Pets**. Approved by **Vets**.

“The new PetSoft retractors are a perfect addition to our veterinary dental practice. With the variety of sizes and the soft yet bendable retraction contour, I find myself constantly using the soft retractors both in the exam room as well as in the operator. We also see an extraordinary benefit of giving PetSoft to our pet owners as a safe and effective retractor to help them better partner with us to monitor dental disease or injuries at home. They are also 100% more professional and comfortable than a Popsicle Stick!”

Dr. Daniel T. Carmichael DVM, Diplomate AVDC
